Education

University of Minnesota Twin-Cities

Expected May 2027 (Senior)

Dual Degree: B.S. in Computer Science and B.S. in Economics (GPA: 3.517)

Minneapolis, MN

- **Relevant Coursework:** Advanced Algorithms and Data Structures, Software Engineering I, Fundamentals of Machine Learning, Database Systems, Dev. of Secure Software Systems, Industrial Organization & Antitrust Policy, Environmental Economics
- CSE Dean's List, Spring 2024, Spring 2025, and Spring 2026

Projects

HarvestGrid Web App (In Progress)

- Developing a web platform using **Next.js** and a **PostgreSQL** backend that connects local farmers and restaurants for streamlined farm-to-table supply management.
- Designed and implemented a scalable database schema and integrated **Supabase's RESTful API** for efficient data management between frontend and backend.
- Built responsive front-end components with **React** and server-side rendering to ensure fast performance and accessibility across devices.

Goods4Goods App (In Progress)

- Building a cross-platform mobile and web app using **React Native** and **Supabase** enabling users to trade items without cash transactions.
- Designed and implemented key user interfaces and image upload features for streamlined usability.
- Project emphasizes modern full-stack development, cross-platform compatibility, and backend integration with minimal external dependencies.

Drone Package Delivery Simulation

- Implemented a drone delivery simulator in **C++** with Docker containerization, optional theft events, and a notification system for completed deliveries.
- Developed multiple path-finding algorithms for route optimization and evaluated efficiency across strategies.
- Demonstrated skills in algorithm design, object-oriented programming, and simulation of real-world systems.

Experience

HaFSBX

May 2026 – Present

R&D Intern

Maplewood, MN

- Full stack web app development with React, Next.js, Three.js, CSS, and Django Rest Framework (DRF).
- Full ROS2 lifecycle development and deployment in XML, Python, and C++.
- Backend API and data pipeline development and maintenance with Bruno and OpenAPI.
- NVIDIA Isaac Sim, Mission Control and Mission Dispatch proficiency.

Lavner Education

June 2025 – Aug. 2025

Internship - STEM Instructor

St. Paul, MN

- Taught and mentored students (ages 6–14) in Python, C++, robotics, and AI with Ethics, fostering problem-solving and teamwork skills.
- Collaborated with instructors to refine curriculum, adding interactive coding challenges and hands-on projects that improved student engagement and project completion rates.
- Debugged student code and robotics programs in real time, providing individualized guidance and reinforcing core programming concepts.
- Troubleshoot technical issues with laptops, IDEs, and robotics kits, minimizing class disruptions and ensuring smooth delivery of lessons.

Technical Skills

Languages: Python, C++, Java, JavaScript, SQL, OCaml

Frameworks: React, Next.js, React Native, Django, Django Rest Framework, Three.js

Robotics: ROS2, ROS, Rviz, IntellIJ

Tools: Git, GitHub, Docker, Linux, Bruno, Figma, RStudio
